

Integration, Workflow and Business Process Automation.

Which is your priority?

TaskCentre is a Business Process Management (BPM) Suite that enables any organisation to automate the costly, repetitive administrative activities carried out by its employees.

Why do companies running SAP Business One turn to TaskCentre?

The TaskCentre BPM Suite leverages the powerful capabilities of SAP Business One to bring people, systems and information together within an organisation through the acquisition, manipulation and integration of information; offering a generic approach to automated processes specifically designed to meet precise business requirements.

Here are some sample solutions built on the TaskCentre for SAP Business One platform:

- | | | |
|---|--|---|
|  Automated Credit Control |  Purchase Invoice Approvals |  Equifax Integration |
|  Automated Delivery Notes |  Holiday Request Approvals |  Magento Integration |
|  Automated Sales Reports |  Sale Discount Approvals |  FedEx Integration |

Key features of TaskCentre for SAP Business One:

- | | |
|--|--|
|  Advanced Business Alerts |  Document Automation |
|  Data Services & Integration |  Workflow |
|  Subscriptions & Requests |  Web Content Publishing |

“ TaskCentre for SAP Business One delivers both a high monetary and productivity return to our company. We view the product as an essential extension of SAP Business One. ”
Sean Ware, Managing Director for TSG Ltd.
